

payment of the \$380.00 extension fee is enclosed. Please charge any additional fee due and credit any overpayment to Deposit Account 06-1205.

In response to that Office Action, please amend the above-identified application as follows:

IN THE CLAIMS

Please amend Claims 1, 4, 5 and 9-14 as follows:

1. (Twice Amended) A document processing system

comprising:

document retaining means for retaining a plurality of folders each for storing at least one document;

B1 candidate folder selecting means for selecting [a] at least one candidate folder suitable for retaining a new document by comparing a feature of the new document with an average of features of [the] documents stored in a folder among the plurality of folders; and

notifying means for providing [a] notification of the candidate folder selected by said candidate folder selecting means, in order that an operator can determine a folder in which the document will be stored, based on the notification.

4. (Twice Amended) A document processing system

comprising:

judging means for judging a similarity degree between document information and a plurality of sets of information of documents stored in a folder;

*DD*  
similarity order calculating means for calculating a similarity order of a plurality of folders in accordance with the similarity judged by said judging means; and

*Cf*  
notifying means for providing notification of the similarity order of the plurality of folders calculated by said similarity order calculating means, in order that an operator can determine a folder in which the document will be stored, based on the notification.

5. (Twice Amended) A document processing system

comprising:

retaining means for retaining a plurality of folders, each for storing a plurality of sets of document information;

selecting means for selecting [a] at least one folder from among said plurality of folders based on a number

of sets of document information containing a keyword inputted as a search condition; and

*B3  
cont*

notifying means for providing a notification of the folder selected by said folder determining means, in order that an operator can determine a folder in which the document will be stored, based on the notification.

9. (Twice Amended) A document processing method comprising the steps of:

retaining a plurality of folders, each of which is for storing at least one document,

*B3  
cont*

selecting [a] at least one candidate folder suitable for retaining a new document by comparing a feature of the new document with an average of features of [the] documents stored in a folder among the plurality of folders; and

providing a notification of the candidate folder selected in said selecting step, in order that an operator can determine a folder in which the document will be stored, based on the notification.

10. (Twice Amended) A document processing method comprising the steps of:

judging a similarity degree between document information and a plurality of sets of information of documents stored in a folder;

calculating a similarity order of a plurality of folders in accordance with the similarity judged in said judging step; and

providing notification of the similarity order of the plurality of folders calculated in said calculating step, in order that an operator can determine a folder in which the document will be stored, based on the notification.

11. (Twice Amended) A document processing method comprising the steps of:

retaining a plurality of folders, each of which is for storing a plurality of sets of document information;

selecting [a] at least one folder from among the plurality of folders based on a number of sets of document information containing a keyword inputted as a search condition; and

providing [a] notification of the folder selected in said selecting step, in order that an operator can determine a folder in which the document will be stored, based on the notification.

12. (Twice Amended) A computer readable storage medium storing programs executing the steps of:

retaining a plurality of folders, each of which is for storing at least one document;

*B3, COM*  
selecting [a] at least one candidate folder suitable for retaining a new document by comparing a feature of the new document with an average of features of [the] documents stored in a folder among the plurality of folders; and

providing a notification of the candidate folder selected in said selecting step, in order that an operator can determine a folder in which the document will be stored, based on the notification.

13. (Twice Amended) A computer readable storage medium storing programs executing the steps of:

judging a similarity degree between document information and a plurality of sets of information of documents stored in a folder;

calculating a similarity order of a plurality of folders in accordance with the similarity judged in said judging step; and

providing notification of the similarity order of the plurality of folders calculated in said calculating step,  
in order that an operator can determine a folder in which the document will be stored, based on the notification.

*b3  
Conf*  
14. (Twice Amended) A computer readable storage medium storing programs executing the steps of:

retaining a plurality of folders, each of which is for storing a plurality of sets of document information;  
selecting [a] at least one folder from among the plurality of folders based on a number of sets of document information containing a keyword inputted as a search condition; and

providing [a] notification of the folder selected in said selecting step, in order that an operator can
